

HELPING ANIMALS WHEN THEY NEED US MOST

Meet Bruno. The playful chocolate lab mix swallowed a tennis ball rope toy, landing him in an emergency veterinary clinic with a potentially fatal blockage. His owners couldn't afford the life-saving surgery, but thanks to a dedicated veterinary team and the AVMF REACH Program™, Bruno underwent successful surgery and got another chance at life.

The AVMF REACH Program steps in when financial barriers prevent pets from getting the care they need. As members of the American Veterinary Medical Association, our veterinarians are proud to participate in this program.

Join us in **REACHing** more animals in need.
